-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election without traverse of species 1, the unit sliding relative to the arm in the reply filed on 04 March 2005 is acknowledged. As the prior art search resulted in art best directed to species 2, the restriction requirement is withdrawn, and all the pending claims have been treated on their merits.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 19 recites the limitation "the distributor" in line 7. There is insufficient antecedent basis for this limitation in the claim.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 7, 8, 18-22 and 52-54 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kimura et al US005679063A in view of Mok et al US 20020113039A1. '063 discloses the claimed invention except for providing a nozzle or fluid unit that slides or rotates relative to the dispenser arm. '039, figures 3 and 5, teaches, in a fluid dispenser to clean or etch the edges of a wafer during or after processing, teaches that the nozzles or fluid units slide along the support arm, as they

pivot about a pivot point on the end of the support arm, to allow the positions of dispensing to be adjusted relative to the support arm. It would have been obvious to one of ordinary skill to have provided '063 with the sliding, rotating nozzles or fluid units taught by '039, figures 3 and 5, to allow the nozzles or fluid units to be precisely positioned regardless of the size or shape of the workpiece.

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Other similar devices are cited of interest.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to M Rachuba whose telephone number is **(571) 272-4493**.
